

HD Wireless Sender & Receiver

Model no.BCHDMIWE

1080P Wireless HDMI Transmission including 3D video

INTRODUCTION

Thank you for purchasing BCHDMIWE HD Wireless sender & receiver. Your satisfaction is very important to us. BCHDMIWE is designed to make the use of your HDTV equipment more comfortable and versatile. BCHDMIWE is the ideal product for HD wireless applications. Sometimes you may find that a cabled connection is not suitable, a long HDMI cable is not available, or a cabled connection is just not an option. You can use the BCHDMIWE for your HD wireless applications such as Home Theatre, cross-room HD wireless, meeting rooms, or game room applications.

FEATURES AND CONTENTS

Features:

- Supports wireless transmission of HDMI up to 1080p
- Supports wireless transmission of 3D HDTV signals over HDMI
- Less than 500ms low latency
- HDCP compliant
- Room to room HD wireless transmission
- Up to 30m Line of Sight long distance transmission

Package Contents

- 1x Transmitter main unit
- 1x Receiver main unit
- 1x Type A USB to Micro USB power cable (Y type model)
- 1x USB power cable
- User Manual

CONNECTION & OPERATION

Transmitter Box

Receiver Box

Note: the IR IN function is optional to difference Transmitter BOX.

Connection

- Step 1:** Direct plug the connect of the HDMI IN of BCHDMIWE Transmitter to a Source device or Notebook (Satellite receiver, CATV STB, BD player, PS4, PS3, Xbox), you can use another HDMI cable connected the HDMI OUT to the HDMI IN of BCHDMIWE.
- Step 2:** Use HDMI cable to connect the HDMI OUT of BCHDMIWE receiver to a display device (HDTV, Projector)
- Step 3:** Connect the Y type model USB power cable to the Power Jack (Micro USB type) of BCHDMIWE Transmitter.
- Step 4:** **Connect USB power cable to the Power Jack (Micro USB type) of BCHDMIWE Receiver.**
- Step 5:** Connection completed & ready to use.

If no video signal on your display, please Pairing the TX and RX first. (Press the Pairing key of RX box and then press the Pairing key of TX Stick).

Operation

A. Installation

1. Make sure your input AC voltage conforms to the adaptor specifications.
2. **Only use the power adaptor provided with the BCHDMIWE. If you use your own adaptor, make sure the output connector is micro USB and power output is DC 5V /1A.**
3. **If the USB port of your Source device can not support enough power current , Please connect other AC power adaptor which is DC 5V/1A to the power connector of BCHDMIWE transmitter.**
4. With direct line-of-sight, the maximum range of A/V signal transmission can reach up to about 30 metre, and this distance would be shortened by obstacles or walls placed between transmitter and receiver. (The optimum indoor range is less than 30 metre)

B. TX & RX PAIRING MODE

1. First Press “Pairing” key once on the Receiver BOX.
2. You will see message “Connecting through Pairing ...” on screen

3. And then Press “Pairing” key once on the Transmitter Stick.
4. Connection will be auto-established after successfully paired.

LED Indication

There are LEDs and UI for indication of System operation, for more detail please check the table bellowed.

Condition	TX	RX	RX UI(TV Screen)
Star up (Power on)	LED Solid RED	LED Solid RED	Startup image
Pairing (Press the button)	RED LED Flashing	LED solid Blue	Connection through Pairing
No connection	Blue LED Flashing	LED solid Blue	Scanning
Connection & Play	LED solid Blue	LED solid Blue	Video

Note: To prevent overheating, please do not cover BCHDMIWE Transmitter and Receiver with any object.

TROUBLE SHOOTING

1. When there is no picture presented, please:
 - Make sure the direct connection from source device to sink device can work properly.
 - Check if all connectors are connected well; check if all cables can support the transmission speed. High Speed HDMI cables are recommended.
 - Unplug the power cable to restart BCHDMIWE.
2. When there is no sound:
 - Please try to adjust the volume of TV.
 - Check cable connection to see if it fits properly.
 - Check cable to see if it supports video transmission only (DVI) or it is damaged already.
 - HDCP may not match very well at first connection; please unplug the power cable to restart BCHDMIWE.
3. When there is no 3D effect, please:
 - Make sure 3D function of 3D TV (or 3D DLP Projector) is activated (set to AUTO or 3D ON).
 - Make sure 3D function of 3D source device is activated (set to AUTO or 3D ON).
 - Make sure power of shutter glasses is on.
 - Check the power of BCHDMIWE.
 - If the 3D HDTV requires an active shutter glasses for 3D viewing, please make sure the active shutter glasses can match with the 3D TV.
 - If the 3D HDTV requires a passive shutter glasses for 3D viewing, please make sure the passive shutter glasses can match with the 3D TV.
4. If the video is unstable, or snowing image shows on screen.
 - You might get interference form other wireless device or heavy power consumption house ware (ex. Wi-Fi Router, Microwave, air conditioner...). Please keep BCHDMIWE away from those sources of interference.
 - The wireless transmission distance may be too far or blocked by wall or other object. Please place BCHDMIWE at other location where you can get good signal and video quality.
 - Please change the direction of Transmitter and Receiver to get better reception.
5. If the wireless connection fails.
 - Please make sure the power of source device which you want to use is turned ON.
 - Unplug the power cable to restart BCHDMIWE.
 - Re-Pairing the TX/RX again.
